In this application he intimated that because of inalienable connection with the motherland and realizing the poor conditions of community health needs, he decided to come back to homeland and serve in best possible ways. It was further requested that any amenity plot in Islamabad be allotted, so that work could start on the project. After considering the application CDA allotted plot measuring 8 acres to M/s Shifa International on 19-07-1988 and additional land measuring 2.98 acres was allotted on 14-06-1989. @Rs.100/-Sq.yards.” **(Annexure-I).**

**Minister for National Food Security and Research (Mr. Sikandar Hayat Khan Bosan):** Yes it is a fact that, the ECC of the Cabinet imposed ban on commercial export of live animals with effect from 01st October, 2013 to encourage export of value added / processed livestock products and utilize remaining animal by products in the country. This ban is still in place.

In order to stabilize the demand and supply situation of meat in the country, the Ministry of National Food Security & Research in 2013 reviewed and analyzed the situation regarding commercial export of live animals. It was observed that, it was important to encourage the export of processed meat and meat products rather than live animals. The advantage in export of processed meat and meat products is that not only it fetches better price in

international market, but also provides precious livestock by-products such as hides, skins, casings, bones, blood, tallow etc. to many downstream industries in the country. While in case of export of live animals, the local market remains deprived of these valuable by-products. Resultantly, the export of meat, meat products and livestock by-products rose to US\$ 243.221 Million in 2016-17 from US\$ 214.5 million in 2012-13, as compared to a meager US\$ 20 million earned from the export of live animals in 2012-13.

**Minister for National Health Services, Regulations and Coordination (Mrs. Saira Afzal Tarar):** The Government of Pakistan is fully committed to the cause of eradicating polio not only from its soil, but also from the region and the world. The efforts for the purpose have been underway in Pakistan since 1994 and through concerted efforts so far an estimated 600,000 cases of Polio related paralysis and death have been prevented in the country.

Since 2011, the polio eradication is being tackled as a national public health emergency and, a National Emergency Action Plan for Polio Eradication (NEAP) is being developed and implemented across Pakistan under the direct guidance of the National Task Force led by the Honorable Prime Minister and having on board provincial Chief Ministers, Governor KP, Prime Minister of AJK and Chief Minister Gilgit-Baltistan. The yearly updated NEAP document defines a clear-cut action plan, milestones and priorities based on the epidemiology, remaining programmatic gaps and lessons learnt from the previous year. The Task Forces led respectively by the Chief Secretaries and Commissioners are also in

place at the provincial and divisional levels to oversee and provide support to the programme activities implemented at district level by District Polio Eradication Committees under Deputy Commissioners.

Since early 2015, the Government of Pakistan established a dynamic network of Emergency Operations Centres (EOC) at each provincial headquarter and FATA providing joint coordination platform to all stakeholders including different Government departments as well as the national and international partners. These national efforts being undertaken by almost 250,000 valiant frontline workers nationally are efficiently supported by Law Enforcement Agencies and Armed Forces. The data driven programme implementation being vigilantly monitored at all levels by the programme staff as well as independent third party led to a turnaround in Polio situation in the country as evident from below:

- i. Two out of the three types of polio virus (2&3) have been halted.
- ii. Number of Polio cases have steadily declined from highs of 306 in 2014, to 54 in 2015, 20 in 2016 and only 8 in 2017.
- iii. No Polio case has so far been reported in 2018

Closest ever to the goal of virus interruption, we need to continue our efforts at the same pace throughout 2018 aiming to vaccinate every child in special campaigns as well as through routine immunization. The personal leadership and support of the respected members of this august forum will be imperative in their constituencies; especially during the planned monthly campaigns from now till May 2018.
